Hello Dr. Tatavartiji,

I am off to San Francisco coming Thursday attending Investors Symposium.

I have already contacted a few of the Investors and gone thru CATS with the videos.

Most of these want to congratulate you on your brilliance with these technologies.

Several of them pointed out that success should start within India and South East Asia as the problems in these countries are more evident.

They also mentioned that its best to get in partnership with a large organisation for execution and we should focus on technology and

deliver a full proof systems.

I, also, personally want to say WELL DONE and I am very proud of you.

I will do my best to create more time for CATS and help to make 2017 a CATS year.

Kind regards,

Ashok
